

UNIT OVERVIEW & LEARNING JOURNEY

YEAR 10 – Creative iMedia: TERM 1 & 2

R097 – INTERACTIVE DIGITAL MEDIA

PRIOR LEARNING (from Key Stage 3):

Aim of this unit:

This is a mandatory coursework unit that students will study for two terms, using the scenario provided by OCR. The final coursework mark will be submitted to the exam board in May.

In this unit students will learn to design and create interactive digital media products for chosen platforms. They will learn to select, edit, and repurpose multimedia content of different kinds and create the structure and interactive elements necessary for an effective user experience. Completing this unit will provide them with the basic skills for further study or a range of creative and technical job roles within the media industry.

Assessment Procedures:

This is the first piece of coursework which students will need to complete independently. This unit is worth 35% of the overall course.

Grading for the course is:

- Pass - equivalent to grade 4 at GCSE
- Merit - equivalent to grade 5.5 at GCSE
- Distinction - equivalent to grade 7 at GCSE

For this coursework, students will learn to design and create interactive digital media products for a chosen platform. They will learn to select, edit, and repurpose images, video, and audio to create a product for a client. They will combine these different interactive elements to give the end user (target audience) an effective experience of the product they have created.

Homework:

Homework will be set at least once a week. Details of individual homework can be found on Synergy.

How can you help?

Encourage your child to attend sessions with their teacher after school to improve their coursework. They should also review their theory regularly at home, as well as complete homeworks thoroughly as they are all from past exam papers.
